

TESTIMONIALS

Nikhil

770

I highly recommend Gateway Abroad Jaipur for GMAT coaching. It was a 3 month course. Very satisfactory and worth every penny. The faculty was experienced, the study materials were comprehensive, and the mock tests were invaluable in preparing me for the exam. With their help and assistance, I scored 770. Overall, the best experience. Thank you!

Siddharth

I had a fantastic experience with the entire Gateway Abroad team while prepping for my GMAT. The team was always available for doubt solving or any other problems I had while preparing. Because of them, I was able to score 785. My main trainer was incredibly knowledgeable, she helped me with several tips and tricks that made all the difference on the test day. If you are looking for the personal attention and ample amount of study material, it will be the right place for you.

Priyanshu

Few months ago, I have taken admission in Gateway Abroad for GMAT class. They are providing all kinds of support to their students and are guiding them in all prospects whether it be by solving doubts, with tons of resources or by giving regular feedback sessions. Before I came to them, I used to face a lot of issues in quant as my concepts were unclear, but with their pedagogy and the main focus on fundamentals, this section became my strength. Overall, I cracked the exam with 750 scores which would have been unattainable without them. So, thank you so much for making impossible possible.

Khush

Gateway Abroad is the complete package for those targeting 750+ score in the GMAT exam. I'm really happy I've chosen to do the course with them. Their study plan is well-organized and very insightful, the trainers are skilled and friendly. I felt that every session was very informative and was delivered very properly. I want to thank all the staff, I truly appreciate professionalism, commitment, and support. Huge thanks to the trainers and coordinators who always helps in fulfilling dreams of GMAT aspirants!

ABOUT GMAT

The GMAT is a graduate business school admissions test that is accepted by more than 7,700 programs at over 2,400 business schools worldwide. It is designed to measure the problem-solving, critical thinking, and data analysis skills that are most relevant to graduate business programs. Taking the GMAT shows that you are serious about business school and can help you stand out during the admissions process. This exam highlights your critical thinking, problem-solving, and data analysis abilities, essential for thriving in an MBA program and your future career.

Verbal Reasoning

23 questions,
45 minutes

Quantitative Reasoning

21 questions,
45 minutes

The three components of the GMAT test

Verbal Reasoning

This section assesses your aptitude for reasoning, analysing arguments, and reading and comprehending written content. It consists of 23 questions on critical reasoning and reading comprehension.

Your ability to comprehend words and statements, recognise logical connections between important points, draw conclusions, and track the growth of quantitative ideas is measured by reading comprehension questions. In particular, the ability to read for the primary idea, supporting idea, inference, application, logical framework, and style will all be assessed.

Critical Reasoning tests assess your capacity to present arguments, assess arguments, and develop or assess a course of action. Questions for Critical Reasoning are predicated on brief reading passages, typically lasting no more than 100 words. Usually, the brief text is followed by a question that asks you to select which of the five possible answers best supports or undermines the argument, explains why the argument is incorrect, or strengthens or weakens the argument. To answer the questions, no particular understanding of the subject is required.

The GMAT Quantitative Section is designed to test your quantitative reasoning—your ability to think logically about quant concepts. It covers basic math concepts, including arithmetic, algebra, statistics, and more but it's not truly a math test (though it can certainly feel like it). The section contains only one problem type: Problem Solving.

The purpose of the Verbal Reasoning section of the GMAT is to measure your competency in reading and comprehending written material, reasoning and evaluating arguments, and correcting writing for clarity in standard written English.

This section assesses your foundational knowledge in algebra and arithmetic as well as your problem-solving ability. There are twenty-one Problem Solving questions in all.

These kinds of questions call for a basic understanding of algebra and arithmetic. Correct answers to these questions depend more on reasoning and analytical abilities than on the underlying mathematical knowledge. Using a calculator to complete this section is not permitted.

It consists of 20 questions that ask you to evaluate the relationships between various sources and information types—such as verbal, numerical, and graphic—and how they can be used to help you make wise decisions.

The Quantitative section of the GMAT has 21 question that test takers are given 45 minutes to complete. The section tests arithmetic, algebra and geometry.

While you will be expected to use these math skills to solve the problems presented, the test is focused more on your critical-reasoning and problem-solving skills themselves than difficult math concepts.

Data Insights

The Data Insights segment assesses candidates' aptitude for interpreting, analyzing, and applying data to practical business situations. One of the most pertinent and in-demand skills in business today is digital and data literacy, which is also measured by this tool.

The Graphics Interpretation test assesses your capacity to deduce relationships and draw conclusions from data presented in graphical images such as scatter plots, bar charts, pie charts, and statistical curve distributions.

Two-Part Analysis: Evaluates your capacity to handle challenging issues. They could be verbal, numerical, or a mix of the two. The format is designed to be adaptable in order to accommodate a variety of content. You are tested on your ability to solve simultaneous equations, weigh trade-offs, and identify relationships between two entities.

This section contains the following types of questions:

Data Sufficiency: Evaluates your capacity to assess a quantitative problem, identify the pertinent data, and establish when there is sufficient data to address the issue.

Multi-Source Reasoning: Assesses your capacity to carefully evaluate information from various sources, such as text passages, tables, graphics, or any combination of the three, in order to provide multiple answers to questions.

Table Analysis: Assesses your capacity to organise and examine a data table, akin to a spreadsheet, to identify pertinent information or data that satisfies predetermined criteria.

The Graphics Interpretation test assesses your capacity to deduce relationships and draw conclusions from data presented in graphical images such as scatter plots, bar charts, pie charts, and statistical curve distributions.

Two-Part Analysis: Evaluates your capacity to handle challenging issues. They could be verbal, numerical, or a mix of the two. The format is designed to be adaptable in order to accommodate a variety of content. You are tested on your ability to solve simultaneous equations, weigh trade-offs, and identify relationships between two entities.
